

## FREIGHT RATES HIGHER; TO FILE PROTEST AGAINST NEW INCREASE OF RAILROADS

Freight rates on nearly every commodity shipped into El Paso will be advanced again December 1, unless a protest is filed with the Interstate Commerce commission and cases shown why the announced advances should not be made. This information has been received by the traffic department of the chamber of commerce from the Interstate Commerce commission.

The advanced rates are published in what is known as the Southwestern lines tariff #1-B and provide for an increase on all class rates of from 1 to 10 cents per 100 pounds. These rates apply to nearly all territory east of Chicago and the Mississippi river, excepting points on the Atlantic seaboard.

Almost all commodity rates from New York are also increased a like amount. It is announced. Other rates are to be advanced in this tariff are the rates on bulk from Kansas points, rates on meat from Chicago, Milwaukee and St. Paul, St. Louis, Kansas City, Kansas City, St. Joseph, Mo., and Omaha, Neb., and on structural iron from Minneapolis, St. Paul and other Minneapolis points.

An investigation is being made by the traffic department of the chamber of commerce to determine the reason for the additional increase over those granted by the Interstate Commerce commission and which have been filed.

## GAS IN THE STOMACH IS DANGEROUS

Recommends Daily Use of Magnesia To Overcome Trouble. Caused by Fermenting Food and Acid Indigestion.

Gas and wind in the stomach accompanied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion." Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach disorders. Fermenting food and acid indigestion, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from your druggist a few ounces of Eminent Magnesia and take a teaspoonful in a quart glass of water after each meal. This will drive the gas wind and heat right out of the body, soothe the stomach, neutralize the excess acid and prevent its formation and there is no sourness or pain. Eminent Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.—Adv.
